The **Académie Européenne de Musique**, offers masterclasses with prestigious teachers and is aimed at students of any nationality at higher and advanced levels, without age limit.

The active student will have to present a project to be carried out in the 4 semesters and to be validated during the exam of the 4th semester either:

- projet option 1 : a recording of a video or a CD, published under the tvclassique label, in the "Academy" collection
- projet option 2 : Preparing an international competition program
- projet option 3 : Preparing for a concert tour
- projet option 4 : 4 concertos for piano and orchestra

The semester is divided into

- 3 courses in person or online, which will take place over a weekend once per semester in Paris or another partner city and
- 5 online courses throughout the rest of the semester.

Total 8 courses on the semester

Each semester is validated by an exam either in person or online or by the presentation of a video.

In the event that registrations exceed the number of available places, an entrance exam will be organized.

For New Technologies and musical culture courses, the final program will include a presentation and an original composition.

Courses can be taught in one of the European languages: French, English, German, Italian, Spanish.

The duration of the study course is 2 years divided into 4 semesters to be validated in a maximum of 4 years. All registration is confirmed for the duration of the course (2-4 years) and registration and educational fees are due for the entire duration of the course, in advance for each semester.

The final diploma is delivered after the validation of 4 semesters. The 4 semesters can be validated in 4 years maximum.

Graduate students will be invited to perform in concerts for the Live Concert Hall and for seasons of partner associations.
